

Building solutions I

Designing your building solutions

TECHNOLOGY

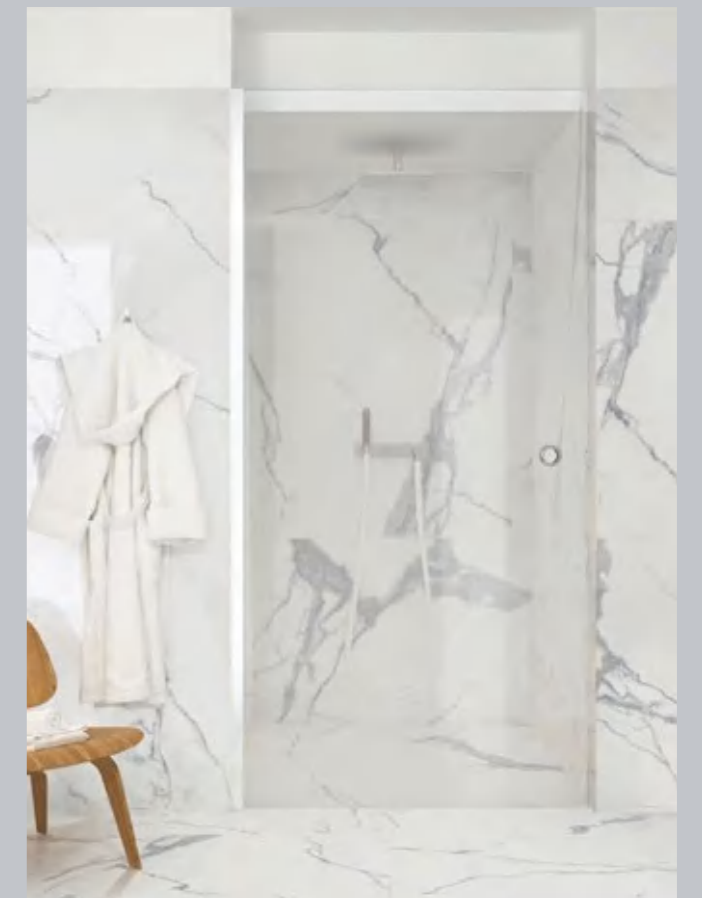

MATERIAL TEXTURE THE AWAKENING OF TECHNOLOGY

We explore the boundaries of science and technology, capture the artistic inspiration of designers into the beauty of the world, pay tribute to the original heart, the beauty of the artisan build time and life. Mind the dream,

innovation and breakthrough to build a better living environment and unremitting efforts. Independent research and development innovation system, to turn inspiration into reality.

The unique material of porcelain congeals the wisdom of human and the power of science and technology, takes the beauty of nature and integrates the beauty of science and technology to create classic works.

ART

LIGHT AND SHADOW THE AWAKENING OF ART

Dare to subvert tradition and keep pace with the times. Transform the traditional tile brand into a variety of artistic images, so that each tile becomes a work of art worth displaying.

Through various innovations, the magic of humanities and light and shadow design is condensed between square inches,

turning it into the charm of art and decorating life. Appreciate life from art, and appreciate art from life, make art live, and make life artistic.

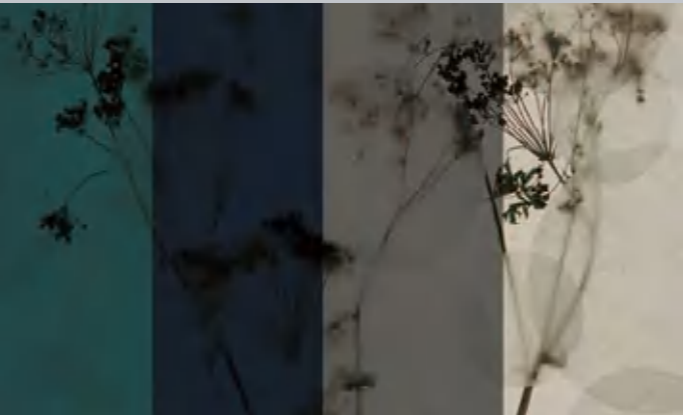

NATURAL THE AWAKENING OF LIFE

The masterpiece of nature is full of vitality. Turn decay into magic, turn cold ice into warmth.

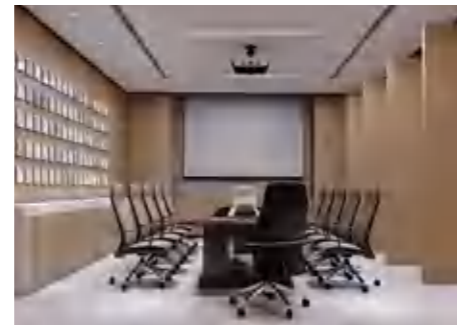

The design of Dongpeng tiles revolves around the original natural landscape to maintain a dialogue with nature. Provides a new interpretation of the residence,

that is no longer a simple and independent residence, but more like a space integrated with nature, in a non-disguised way, symbiosis with nature.

The hellenic mythologies are lost in the mist of the past, yet its marvelous stones are still shining all its splendor in the modern building materials industry. Our "art beats nature" marble is born exactly in this most inspiring capital. Extracting from the mines in North Greece, Caliza keeps its purity coming out of mud unsoiled. With this extra quality, it is as gentle as jade, as elegant as pearl. Being like cracks of light filtered through the shutters, the exquisite texture and delightful grains make it a noble choice for premium space like villa and hotel, with an extensive size range catering to the various needs to all countries and customers.

The time marble is inspired by European palaces, castles, and churches, extracting marble elements from it, showing the passage of time, the wind, frost, rain and snow, as well as the scratches and holes left by time on the walls and ground of the palace. The texture of this series adopts the old marble texture of European palaces. By lightly pickling the original stone, treating with small scratches, and restoring the time-eroded texture with slight fluctuations, combined with the pit mold + dry-grain soft polishing process, the stone is created with texture, experience and human firework.

Chile is currently the country with the most abundant copper mines, with its reserves accounting for 29% of the world's total; its output and exports also rank first in the world. Pure copper is a soft metal, the surface is red-orange with metallic luster when it is just cut, and the element is purple-red. Copper is one of the earliest metals used by humans. As early as prehistoric times, people began to mine open-pit copper mines and use the obtained copper to make weapons, utensils and other utensils. The use of copper had a profound impact on the progress of early human civilization. World Impression-Briliant Copper, inspired by the brass material that modern minimalist luxury homes love. After pickling with a cold plate, the flame-like colors are further layered, creating a dazzling vision of the space.

Steel is a general term for iron-carbon alloys with a carbon content between 0.02% and 2.11% by mass. Brazil is a major steel country in South America and the sixth largest steel producer in the world. Its steel exports reached 12 million tons, accounting for 54% of the country's total steel production. Dongpeng World Impression Lie Steel uses stainless steel material with a cold texture as the base, and covers the surface with lightweight concrete. The creative superposition of two different materials makes the texture and vision more layered.

The Country of Silver---In 1527, the Spanish explorer Sebastian Cavoto led an expedition to the South American continent, and went upstream from a wide estuary to the interior. The explorers found that the local Indians were wearing a lot of silver ornaments, thinking that the local area was rich in silver, so they named the river La Plape River and the area called La Plata District. The Spanish colonial rulers later converted La Plata into a province. Dongpeng World Impression Silver Lacquer, takes the color and texture of silver, and sticks the silver foil on the paint base plate in a regular manner, and then irons it flat. The dazzling dazzling sense shows the temperament, and it also highlights the modern geometric sense. personality.

WT10X158319

Iron is the earliest discovered, the most widely used, and the most used metal in the world. Brazil's iron ore resources are mainly distributed in Minas Gerais, of which Vale is the world's largest iron ore producer and exporter, as well as the largest mining company in the Americas. Stone production accounts for more than 85% of Brazil's total production. Dongpeng World Impression-Zheng Iron, which imparts the texture of iron to the tiles, and the semi-polishing technology of metal dry grains gives them gloss, which is born from the birth of Zheng Iron.

A piece of pure gold the size of a mung bean can even be rolled into gold foil with an area of 0.6m². In addition, it has the strange property of reflecting infrared rays and only allowing visible light to pass through. It can be used to make masks for firefighters. Sticking this gold film on the glass can effectively adjust the indoor temperature. Such golden buildings make people feel as if they have entered a "golden world" that is splendid and like spring in all seasons. Dongpeng World Impression-Gold Lacquer, the color of gold, the texture of lacquer, the texture of golden paint brush and the refraction of dry metal particles in light and shadow create a mottled texture of gold foil to show a different luxury.

PLACEMENT GUIDE

1. Before box opening, please verify product specification/ dimension, color, etc; make sure product of the same model is put in the same area instead of blending product of different types (unless a special decorative effect is pursued on purpose).
2. Before placement, dress the wall or floor well; determine brick arrangement according to placement type; in case of directional pattern, the product shall be applied as per the marked direction to reach the optimal decorative effect.
3. During pre-placement, pull two mutually vertical lines in the dressed ground and check leveling with the spirit meter; the wall vertically is checked by the plummet.
4. The ceramic sheet is recommended to be used together with 225#cement; the ceramic tile is recommended to be used together with 325#cement or glue; before placement, the ceramic sheet shall be fully soaked instead of ceramic tile.
5. Mark line according to tile dimension and pay attention to reserve mortar joint.

6. During placement, tightly seal the joint by glue; upon request by customers, proper color additive can be used to fill in the joint.
7. During placement in main wall corner, proper amount of glue is applied to reach 1cm thickness; put one tile in the glue; slightly knock it with a wooden hammer to ensure the tile surface, edge and the pulled line in parallel or vertical position.
8. During placement of wall tile, slightly knock on the tile a good many times till it is tightly fastened.
9. After placement in 1 hour, clean cement or other dirt in the tile surface timely till thorough cleanliness of tile surface.
10. After placement in 12 hours, make inspection by knocking on the tile surface. In case of hollow sound, rework is required.
11. Don't walk on or sweep the tile till 24 hours after placement. Thoroughly clean the tile by fresh water mixed with detergent. The shining floor and wall will be presented in front of you.

Technical Standards

GLAZED PORCELAIN

PROPERTIES	UNIT	ISO STANDARD REQUIREMENT		RESULT
Size&Deviation	%	SIDE	The deviation,of the average size for each tile from the work size ±0.6	-0.02-+0.03
		Thickness		±5 -0.1-+1.0
Straightness of sides	%	±0.5		-0.03-+0.06
Rectangularity	%	±0.5		-0.03-+0.06
Surface flatness	mm	Center curvature		±0.5 -0.02-+0.04
		Warpage		±0.5 -0.02-+0.05
		Side curvature		±0.5 -0.08-+0.05
Surface quality	-	A minimum of 95% of the tiles shall be free from chip, crack speck and visible defects that would impair the appearance of major area of tiles		Complied
Water absorption	%	Average:E<0.5		0.3
		Individual maximum 0.6		0.3
Breaking strength	N	When the thickness ≥7.5mm,the mean value shall not be less than 1300		2183
Antl-slip	R	9		9
Resistance to household chemical reagent & swimming	-	No less than Class B after test		Class A
Resistance to low concentration acid or alkali	-	Report the result after test		Class A
Stain resistance	-	No less than Class 3 after test		Class 5
Lead release Cadmiumm release	mg/dm	Report the result after test		No release
	mg/l			No release

UNGLAZED PORCELAIN

PROPERTIES	UNIT	ISO STANDARD REQUIREMENT		RESULT
Size&Deviation	%	SIDE	The deviation,of the average size for each tile from the work size ±0.6	-0.01-+0.02
		Thickness		±5 -0.02-+0.01
Straightness of sides	%	±0.5		-0.04-+0.05
Rectangularity	mm	Length difference of opposite sides ≤2.0		0.5
		Length difference of opposite sides ≤2.0		0.3
Surface flatness	mm	Upward warpage		≤2.0 0.3
		Downwaed warpage		≤2.0 0.3
Surface quality	-	A minimum of 95% of the tiles shall be free from chip, crack speck and visible defects that would impair the appearance of major area of tiles		Complied
Water absorption	%	Average:E<0.5		0.06
		Individual maximum 0.6		0.4-0.08
Breaking strength	N	If thickness ≥7.5mm,N ≥1300		2491
Modulus of Rupture	MPA	Average:≥35 Individual minimum 32		59.8 40.7-84.1
Abrasion resistance	mm	Abrasion CBM ≤175		116
Glossiness	-	≥55		88-90
Resistance to household chemical reagent & swimming pool alkali	-	No less than Class B after test		Class A
Thermal shock resistance	-	Report the result after test		Fully resistance
Resistance to low concentration acid or alkali	-	Report the result after test		Class A
Stain resistance	-	No less than Class 3 after test		Class 5
Coefficient of linear expansion	-	Report the result after test		7.1x10 ⁻⁶
Moisture expansion (mm/m)	-	Report the result after test		<0.01
Shock recovery coefficient	-	Report the result after test		0.83
