## ON - SEN CUSTOM WALL PANEL SERIES

Wall panels are made from eco-friendly materials with polymer films, produced with one-time hot pressing and laminating technology combined with advanced production technology. There are nearly 200 patterns to choose from including the stone, wood, wallpaper and the skin-friendly series.

The wall panel is a high-quality substitute for wooden, stone and wallpaper decoration materials with its fast installation, environmental protection and health, waterproof and moisture-proof, thermal insulation together with its fashionable appearance. With unique advantages in the whole building, the wall panel can be widely used in the decoration of home, offices, administrative buildings, hotels, restaurants, bars and other places.

## Cork of J series

Cork is made from the bark of cork oak, a sustainable resource. The cork oak has significant carbon storage capacity. After each peeling, its carbon adsorption capacity will increase by 5 times, to absorb a large amount of carbon dioxide, release oxygen, and purify the air.

Cork has extraordinary stable properties, making it the perfect eco-friendly material due to its biodegradable and recyclable performance. It features precious qualities, lightness, sound insulation, thermal insulation, tactile comfort, fire resistance and moisture proof.

## CORK

8. Finish cleaning

## CONCRETE CAST SLAB

- Indoor and outdoor decorative panels made from cement and other mineral raw materials, with light weight, high strength, high wear resistant, low density, bendable, high impact resistance, A1-level fireproof, waterproof, impermeability and weather resistance features, without formaldehyde and any other harmful components.
- Suitable for floor, wall space and ceiling. It is preferable for theme stores, brand monopolized shops, dining tables, and bar finishes. It is especially suitable for use in wet places such as bathrooms, toilets, and underground garages, as well as the exterior wall, enclosure hanging board and garden facilities exposed to sunlight and rain.

- Its installation and construction are also extremely simple, for which sawing, planing, gluing, and nailing are allowed.
- Product form, color and specification can be customized according to customer needs.

Combination of traditional craftsmanship and technological innovation

Tile

### Quick

The direct installation time and the time required for the entire project are far less than the installation time of traditional cultural stone products.

### Lightweight

Because it is made of high-tech materials, it is light in weight and does not require the cooperation of other machinery, and can be installed by one person.

### Durable

The product is composed of polymer materials, and sprayed with multiple layers of high-strength coatings to make it resistant to acid, sunscreen, ultraviolet rays, and lasts longer.

### Easy installation

The product mold is finely polished according to the real stone, and after special processing, the appearance of the product is real and delicate, which is no different from the real stone.

### Realistic appearance

The product is designed as an inner card structure with tongue edges, grooves and reserved seams. Most jobs do not require caulking and can be installed directly with screws and nails.

### Multipurpose

All products of Yimei Building Materials have passed professional waterproof, insect-proof and flame-retardant tests, and can be applied to almost any dry flat substrate indoors.

# MOCHA STONE

The PU mocha stone is inspired by the architectural arch element, which combines the beautiful arc shape with the tidal flat. The texture is highlighted under the illumination of the light. The subtlety of mocha stone design lies in the infinite possible splicing methods. Designers can match the scenes as they like, and create more interesting spaces through changes in colors and splicing forms.

Comfortable life, design for you.

Blue brick hexagonal mosaic

Red brick long and short strip

Long and short strip mosaic 290\*300\*12

Hexagonal mosaic 300\*300\*12

Weighs 1.8 kg

Indoor and outdoor walls, homestay hotels, restaurants, art galleries, clubs, ancient gardens, etc.

INSPIRATION AND CREATIVITY

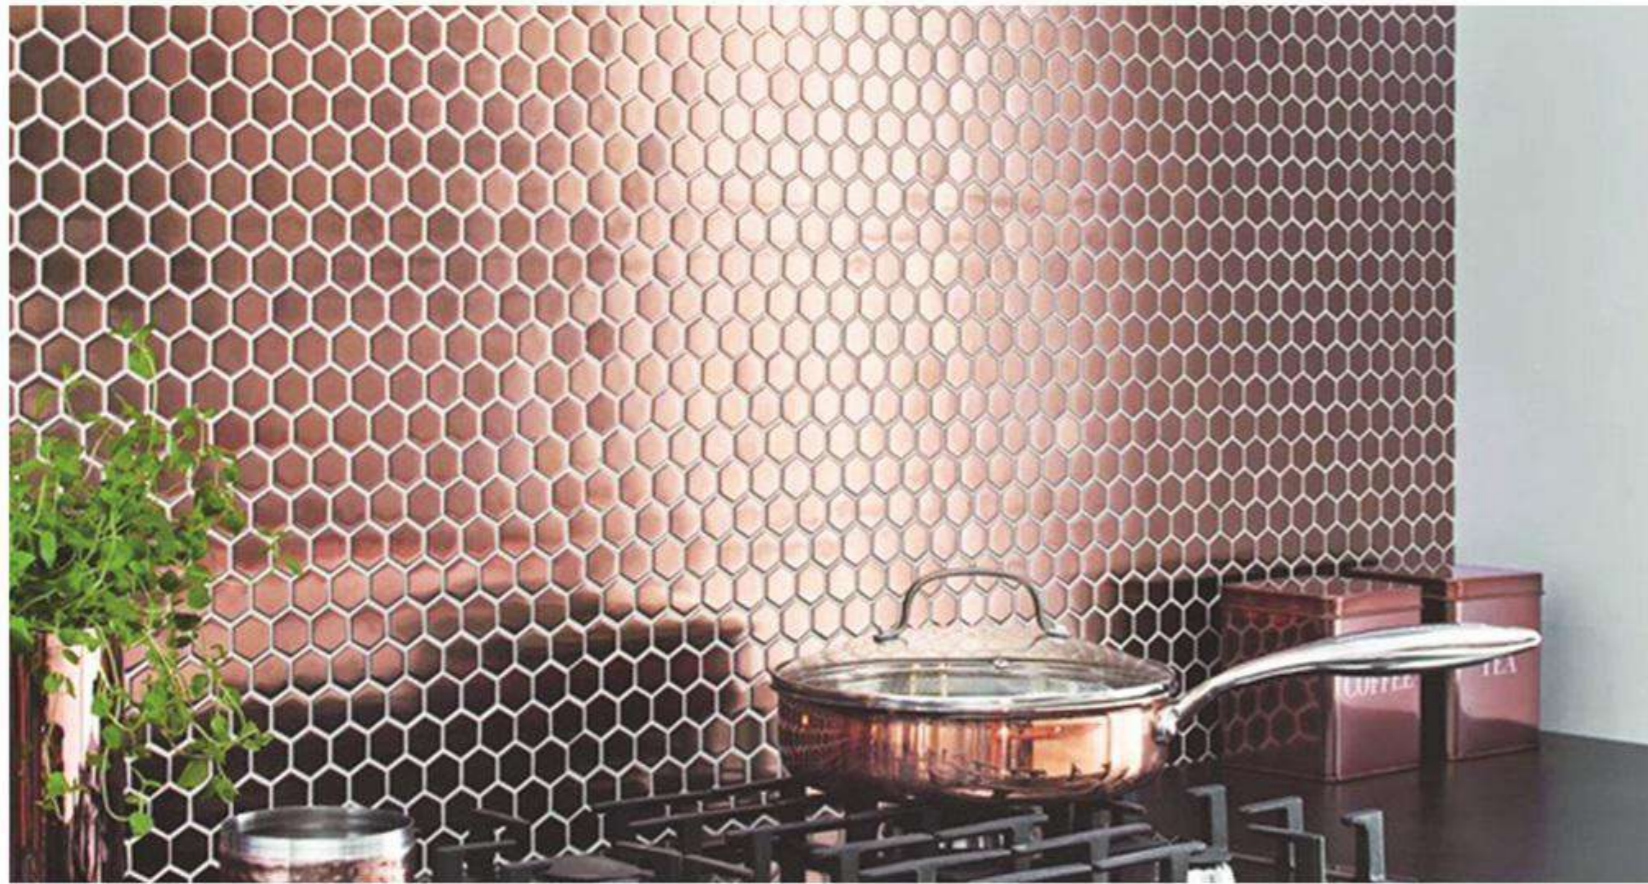

FUSION GO WITH DESIGN

Retro fashion, simple charm

Dirt resistant, aging resistant, long life

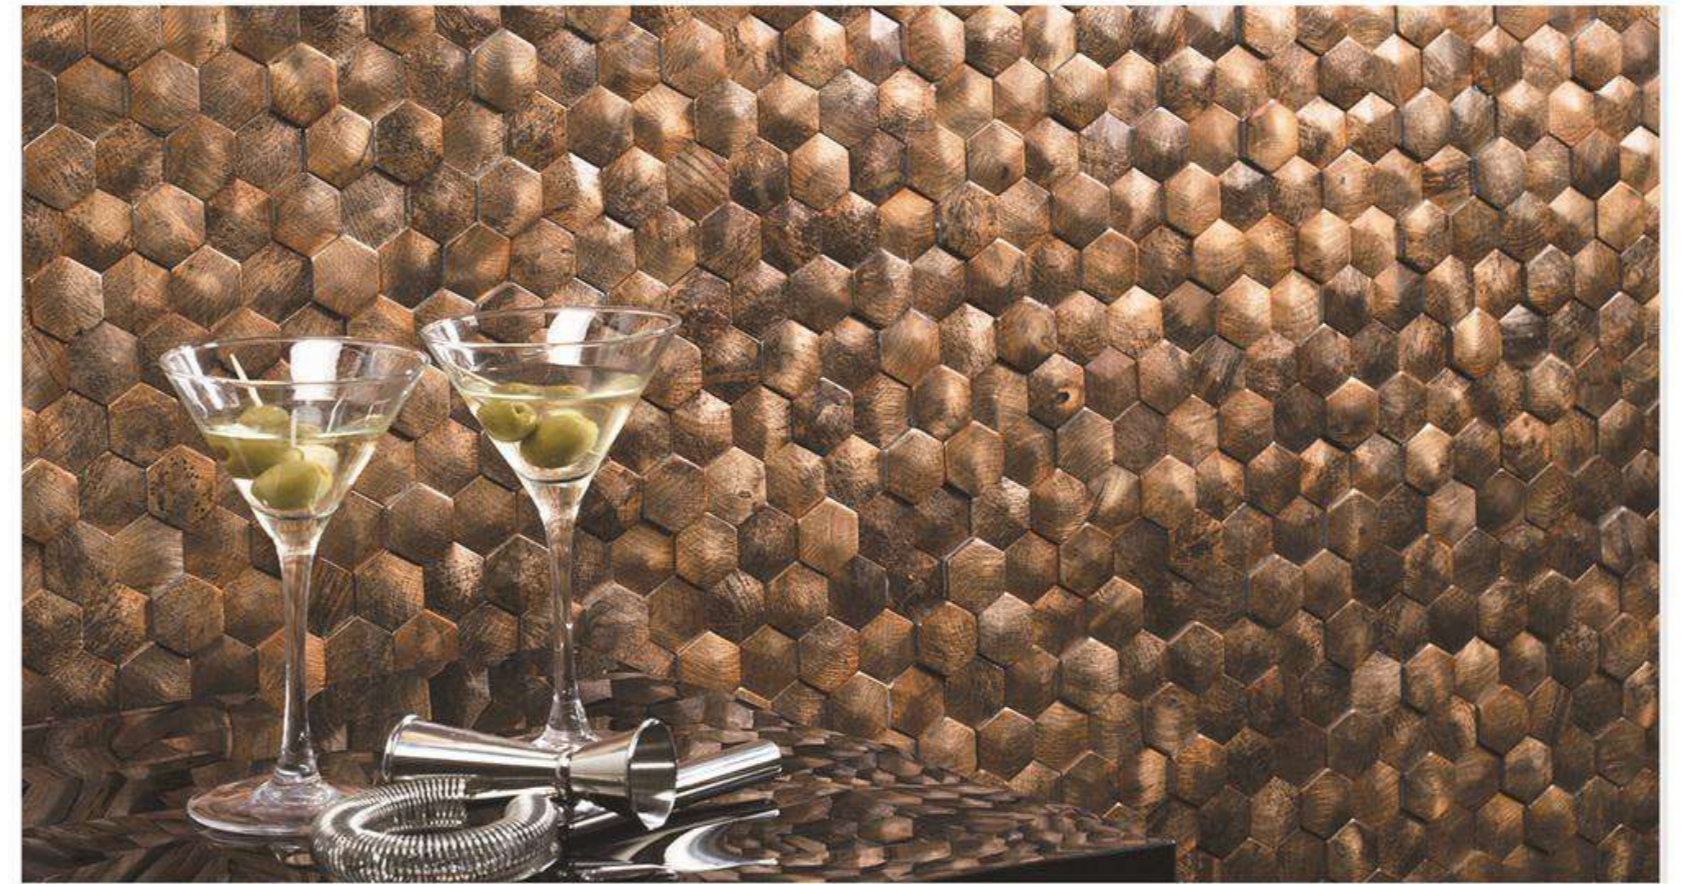

## Resin mosaic

Curved hexagon is more refined, retro, modern and more versatile

Metal tone Stereo simulation  
 Bending and scratch-resistant  
 Easy to install and durable  
 Lightweight and non-fading

## Metal mosaic

Free combination with wear-resistant and non-fading

Good artistic effect and strong decoration  
 Non-toxic, harmless, non-polluting, non-absorbent  
 Product colors are mainly titanium gold, 8K mirror,  
 black gold, champagne gold, rose gold, sapphire  
 blue, purple, red rust, etc.

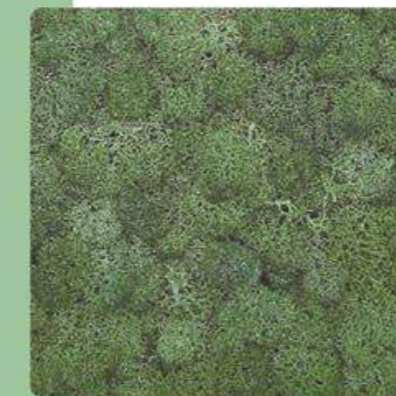

# LIVING MOSS

Using the most advanced natural immortality technology, the moss does not need light, water, fertilizer, and construction. Easy to install, the back panel is made of high-quality sound-absorbing boards, and the surface is covered with a layer of fluffy and dense living moss, which absorbs sound and reduces noise, while purifying the air. The atmosphere is beautiful and the shape is random.

outstanding character**

High-definition texture, high-quality, rich colors

Cost-effective lock installation

Different specifications of large boards and square boards to meet  
various needs

Create a stylish floor | Add artistic sense to the space

# RESILIENT FLOORING

Resilient flooring is a new type of polymer material. Environmental protection, no formaldehyde detected, export quality, certified in North America; rich in designs and colors, embossed with steel plates, and coated with color film on the surface, the texture is real and natural, and the paving effect is good. In the rainy season, the floor heating will not warp and deform, and it is durable. The navigator and artist series come with ixpe foam cotton floor mats on the back, and the explorer series come with cork mute pads on the back.

Navigator

Explorer

Artist

Name: Resilient Flooring

Material: WPC

Specification: Navigator series 1800\*228\*12 mm, Explorer series 1800\*228\*10 mm

Artist series 600\*100\*10 mm

Advantages: super wear-resistant, waterproof, moisture and mildew proof, strong toughness, reverse U-shaped bending can be restored to its original state, silent and noise-proof

Application space: indoor floor

Installation technology:

The ground is self-leveling, and there is no need to lay the floor moisture-proof pad directly on the resilient flooring.

The navigator and explorer series can be tiling or 369 tiles, but not herringbone; the artist series can only tile tiling.

# Wabi-sabi flower tile

\*Only some color swatches are shown

Material: all-ceramic embryo bottom  
Specification: 200\*200\*7 mm  
300\*300\*7mm

Bright and soft color, soft surface, non-slip and wear-resistant, high hardness, low water absorption, neat edges and corners, universal wall and floor. The texture is clear and natural, and the effect is flexible. The flower tiles are just the right embellishment to enhance the style of the entire space and enrich the overall vision. Explain the beauty of life in a simple way.

# SUPER BLACK BRICK

The surface of the brick is polished and the surface is treated with a matte process. The black brick contains metal in the forging process, so it has a great advantage in the function of anti-static.

Super black bricks are very high-end, and they can be placed in entertainment spaces or exhibition halls casually. They are synonymous with high-end in the office hall. The rare extreme black of black brick makes it like a mirror, and it has its shadow in many commercial spaces, showing a sense of space extension and high-end atmosphere in the space.

Vanadium-titanium whole body porcelain black brick Specifications: 600 \* 600 / 800 \* 800 / 600 \* 900 / 600\* 1200 mm, non-staining, anti-fouling, easy to clean and care, ultra-low water absorption, high wear resistance, long service life, enduring.

## 9 leading advantages of super black brick

- ① The blackest black brick sintered in the industry, without other blackening materials, has the blackest blackness in China;
- ② The specular gloss can be up to 110 degrees;
- ③ After magnifying several times, there are no obvious impurities in the polished pinholes;
- ④ There is no obvious difference after sun exposure;
- ⑤ Acid and alkali resistant, ultra-low water absorption, completely antifouling;
- ⑥ High strength, dense and hard texture, the strength reaches more than 50Mpa;
- ⑦ A Black brick bottom embryo is close to the brick surface color,
- B Dyed black bricks have no obvious dyeing wax marks on the four sides and bottom of the bricks.
- C Contacting bricks and keeping clean.
- ⑧ The weight of the monomer is as high as 9.3kg;
- ⑨ Does not contain radiation pollution; green, environmentally friendly, and healthy; and the scope of use is not limited.

Realizing  
perfection in every  
detail

Achieving high  
quality

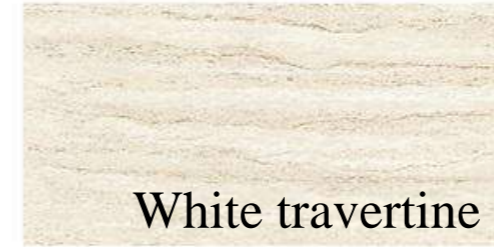

# HOLE IN THE STONE TILE

Hole in the stone tile breaks through the rough surface tactile experience of travertine, and truly restores the texture of holes on the surface of travertine, which are dense and varied in shape. Soothing for a new soft skin experience.

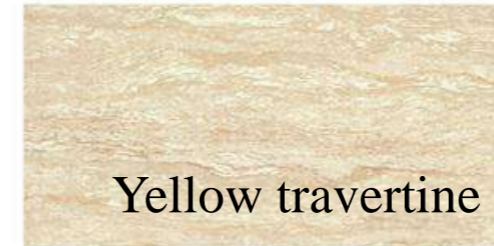

The texture is smooth, the holes are real, the color is natural, the corners are regular, simple and generous, with a sense of fashion, a strong sense of design, low water absorption, and longer life.

Installation technology:

No need to soak in water, cement mortar or tile glue before paving.

White travertine

Yellow travertine

Grey travertine

Name: Hole in the Stone Tile

Material: WPC

Specification: 600\*600 mm, 800\*800 mm, 600\*1200 mm

Color: white, yellow, gray

Variety: One stone multi-faceted, with polished and matt, with holes and without holes

Advantages: smooth texture, real holes, natural color, regular corners

Application space: interior, modeling, background wall

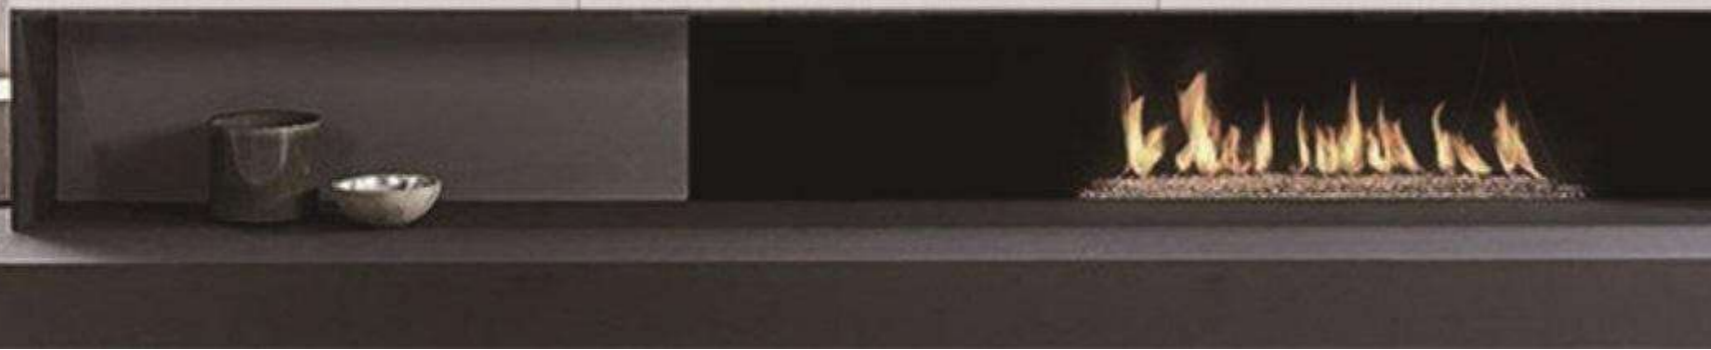

# SOLID COLOR TEXTURED BRICK

Popular cream style —

Solid color texture brick, the whole body is solid color, and the color is adjusted based on 52° white, so the color correction surface has the texture of matte, grooved, slate, and galaxy. 6 colors to choose from, of which 60 degrees white is a cream color, which is suitable for public and home decorations. The solid color texture brick is a brick body with a coexistence of hand and visual sense. The effect will never go out of style.

Construction process:

1. Basic treatment: after leveling the ground, clean the surface, moisten the ground with a little water before the formal construction, and use plain cement slurry as the bonding layer;
2. Elastic line: before construction, the elevation control line will pop up around the wall, and the cross line will pop up on the ground to control the size of the ground division;
3. Pre-laying: pre-laying according to the drawings;
4. Paving: paste with 1:3 cement mortar, the thickness of the mortar is about 20-30 mm, tap lightly with a rubber hammer until it is dense and level, and then level it with an aluminum alloy level;
5. Pointing;
6. Clean.

12660C—60 degree white throughout

12660G—60 degree white throughout

12660H—60 degree white throughout

12660S—60 degree white throughout

Material: solid color whole body embryo

Specification: 600\*1200 mm

Color: 60° white, 70° white, light gray, medium gray, dark gray, black

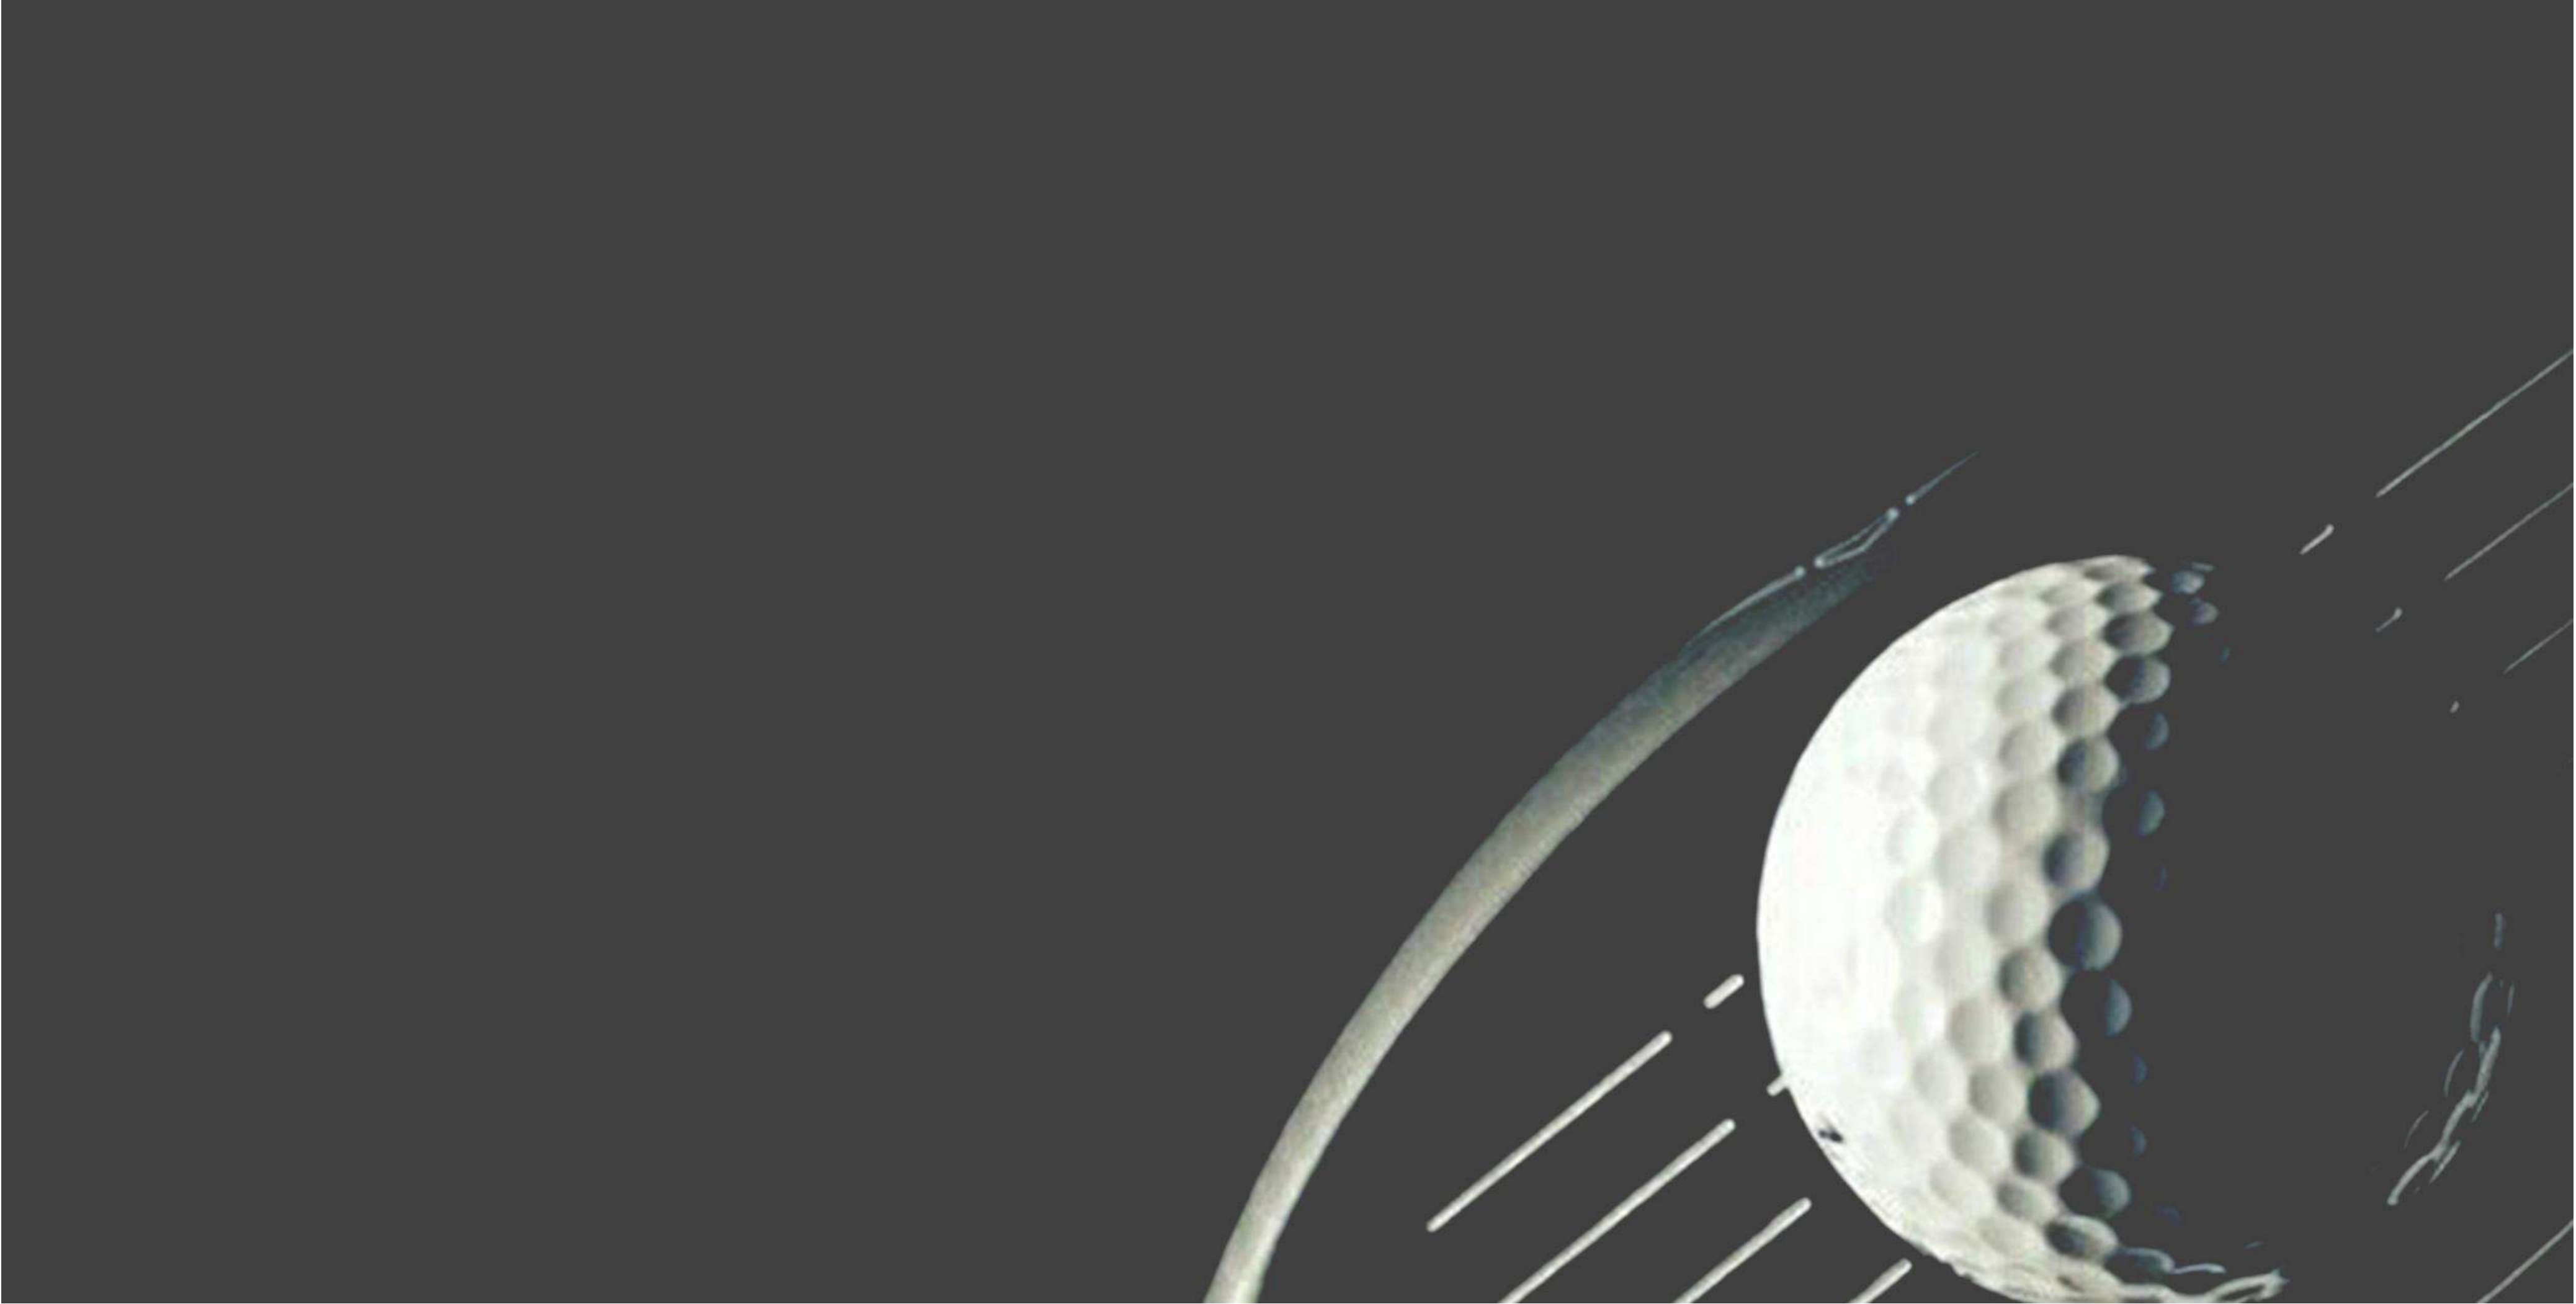

Texture: matte, slate, slotted, stars (60° white, light gray, medium gray)

Features: solid color throughout the body, balance between hand and visual senses, easy to maintain

Application: public and home decorations
