

Decorative metal mesh solutions II

METAL MESH CURTAIN

METAL MESH CURTAIN

Metal mesh curtain is a new type of metal curtain for modern interior decoration. It is also called metal coil drapery. It is produced by special weaving machine by a pre-coiled spiral wire, the wire's length is the curtain's height. Widely used in the construction and decoration industry. It can also be painted into various colors to match different architectural styles and designs. So it is an ideal decorative product for designers and architects.

FIREPLACE MESH CURTAIN

FIREPLACE MESH CURTAIN

Fireplace mesh curtain is a type of fireplace screens and a very popular product around fireplaces. They are made by mild steel or stainless steel material, designed to help block out pesky sparks, enhance the style of your fireplace. HIGHTOP fireplace mesh curtains will make your fireplace the center point of the room. Beautiful, durable and long service life.

STANDARD SPECIFICATION

Material: Mild steel, Stainless steel

One Set: Two panels, with two pulls and rings, totaling 48 inches wide.

Height: 16"-36". Can be customized.

Wire Diameter: 19 gauge

Mesh Opening: 1/4" | 3/16" | 1/8"

Hanger Rings: 1/2 inch Curtain Pull: Included

1/4"Standard Mesh Satin Black

3/16*Mini-mesh Satin Black

1/8"Superfine Mesh Satin Black

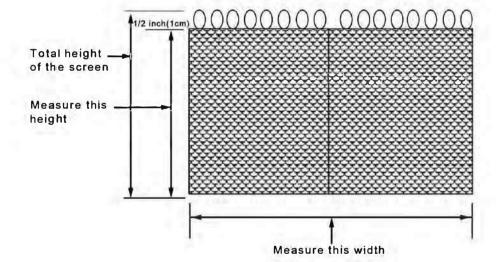

FEATURE

- Painted with rust-inhibiting enamel
- High temperatures resistance
- Corrosion resistance
- Fireproof
- · Long service life
- · Safe and flexible

How to choose the right size screen for your fireplace

- 1.Screen height does not include the height of the hanging rings. The included hanging rings add 1/2" to the height of the screen.
- 2.Replacing an existing screen: Measure the height and width of the existing screen (not including the hanger rings) and order the same height screen.
- 3.Adding a screen to an existing rod; Measure the height of your fireplace opening and subtract 1-inch. (1/2" for ring height + 1/2" for bottom clearance).

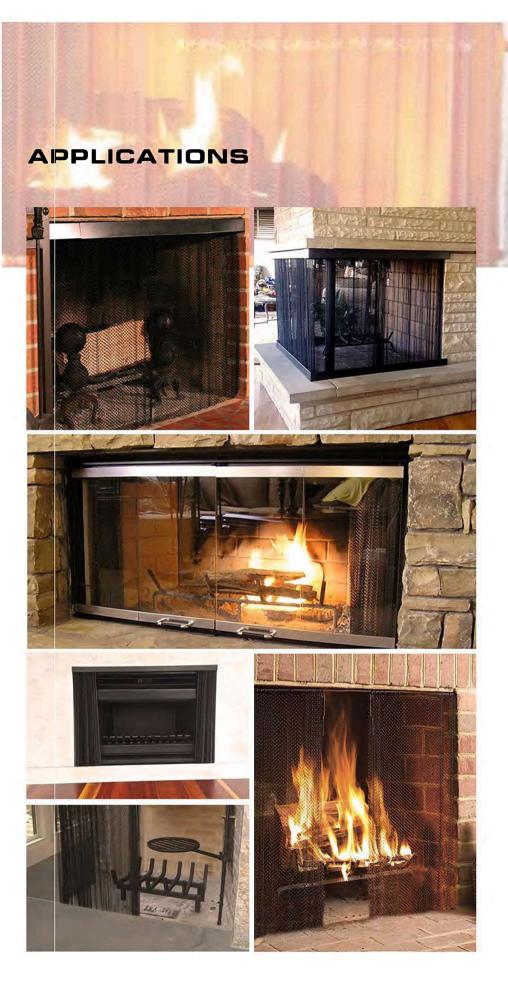

FEATURE

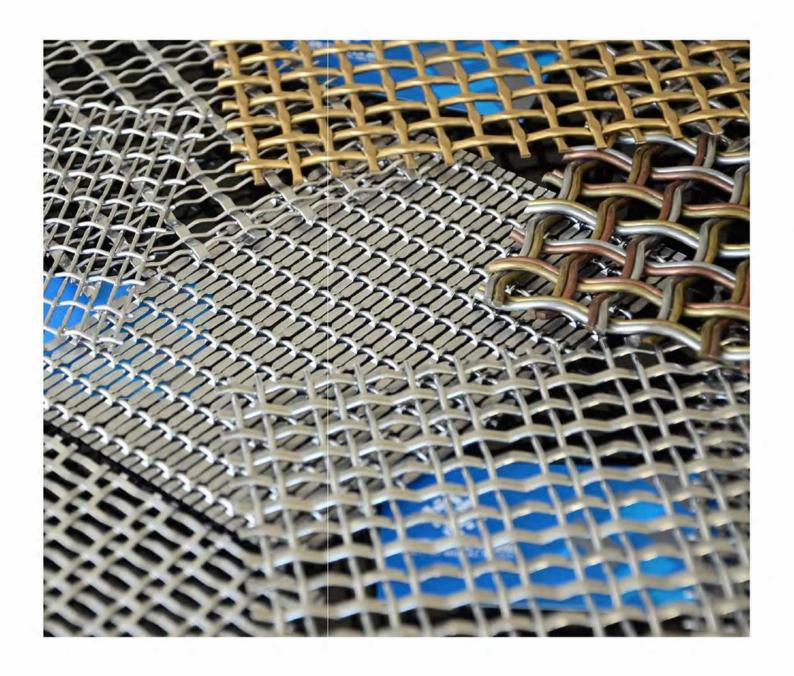

- Painted with rust-inhibiting enamel
- High temperatures resistance
- Corrosion resistance
- Fireproof
- Long service life
- · Safe and flexible

Architectural Spiral Wire Mesh

Architectural Spiral Wire Mesh

Spiral weave mesh, also called balanced weave belt, architectural conveyor belt, is composed of rods in horizon and bend wires in vertical. The rods can be straight or bent. It was originally used in industry, mainly for the transportation of raw materials or products on the assembly

line. Later, because of the beautiful pattern, exquisite workmanship, and other characteristics, it has been gradually accepted and approved by designers in the architecture system. Spiral wire mesh is widely used in architectural decoration, such as window&door curtains, exterior wall decoration, ceiling decoration, store partition, etc.

SPECIFICATION:

Material:stainless steel, carbon steel, brass, copper, other metal alloys.

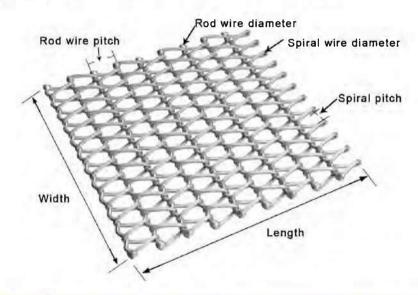

Spiral wire mesh: Round or Flat Spiral wire diameter: 1.2mm-10mm Spiral wire pitch: 3mm-38mm Rod Type: straight or bent

Rod diameter: 1.3mm-5mm Rod pitch: 13mm-64.5mm

Surface treatment: Metal Original color, Titanium Coated, etc.

85% of customers choose Metal Original color

15% customer choose others

Stainless Steel Rope Mesh

Stainless Steel Rope Mesh

Stainless steel rope mesh is called stainless steel cable mesh, zoo mesh, protective mesh, etc. It has a unique decorative style and more strong security. The diamond hole pattern makes the mesh strong and flexible. Different opening sizes can be customized to meet the different needs of customers. Widely used for interior staircase decoration, railing, suspension bridge, zoo protective, etc.

Metal Mesh Laminated Glass

16+Year's experience for producing decorative and architectural wire mesh Glad to work with worldwide architects and designers

Metal Mesh Laminated Glass

Decorative laminated glass uses a colored inter-layer or embedded decorative materials (metal mesh, woven wire mesh, etc.) in the inter-layer of traditional laminated glass. The metal mesh laminate not only makes the glass have excellent resistance to attack, but also protects people from damage from glass debris. Metal mesh laminated glass is safe and strong, and adds elegance and artistic atmosphere to the windows of the building. Therefore, it has become a stylish and practical decoration material in modern architecture.

Specification:

Metal Mesh Material: silver coated wire/copper wire/brass wire/stainless steel wire/etc Glass Options: Low Iron Glass (crystal clear) - as standard

Float Glass (Slight green tint)

Mirror Backed

Thickness: 4mm+4mm (nominal overall thickness 10mm)

6mm+6mm (nominal overall thickness 14mm)

As available in a combination of other glass thickness and metal mesh thickness

Max. Panel Size with Glass: 2000mm x 4700mm

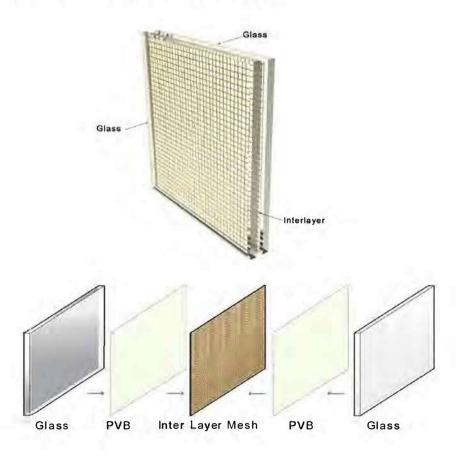

Max. Width of Inter-layer metal mesh: 2000mm

Metal Mesh Pattern Design: Standard weaving designs

Metal Mesh Laminated Glass Feature

The decorative and aesthetic qualities of the finely woven mesh to thick braidled weaves are preserved with the structural strength and practicality of glass, allowing for innovative design solutions, providing new design ideas for designers.

- 1.High strength: metal mesh laminated glass can resist continuous attacks from hammers, chopping knives and other murderous weapons.
- 2.Excellent security: Compared with traditional laminated glass, our glass is embedded with metal mesh to make it resistant to attack and shatterproof performance. The inter-layer also prevents the debris from falling off, thus ensuring personal safety.
- 3.Excellent sound insulation: The laminated glass of the inter-layer can block sound waves and maintain a quiet and comfortable office environment.
- 4.UV resistance: laminated glass has different materials and opening rates, which can effectively prevent direct sunlight, thereby protecting the aging of valuable furniture and items in the room.
- **5.Energy saving and environmental protection**: reduce the transmission of sunlight and reduce cooling energy consumption.

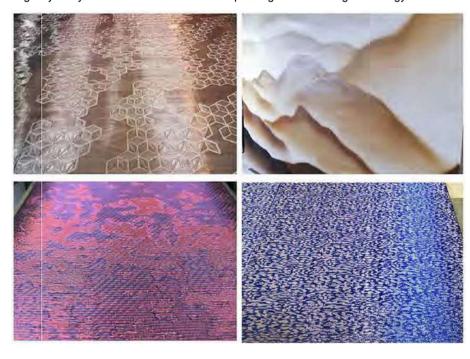

6.one-way vision privacy effect

View from inside

View from outside

7.Cu:stomized colors and patterns: the color can be customized, or the photos can be digitally analyzed and made into wire mesh paintings with weaving technology.

DECORATIVE PERFORATED METAL SHEET

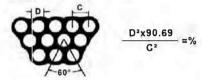

16+Year's experience for producing decorative and architectural wire mesh Glad to work with worldwide architects and designers

DECORATIVE PERFORATED METAL SHEET

Perforated metal sheet is a multi-purpose product, and has a wide range of applications, can be used for building ceilings, sound-absorbing materials; building stairs, balconies, environmentally friendly tables and chairs, as well as shelf mesh and decorative metal panels for architecture external walls. Hightop offers various decorative perforated metal sheets with different styles.

EXPANDED METAL MESH

16+Year's experience for producing decorative and architectural wire mesh Glad to work with worldwide architects and designers

EXPANDED METAL MESH

Decorative expended metal mesh is made by cutting and stretching a metal panel to form various diamond openings. It is available in three materials: Carbon steel, aluminum alloy and stainless steel. Other materials for choose: Copper, Brass, Titanium, Nickel, etc. You can find the best fit for your application. It can also be coated into various colors to match different architectural styles and designs. So it is an ideal decorative product for designers and architects.

EXPANDED METAL - STANDARD

EXPANDED METAL - STANDARD

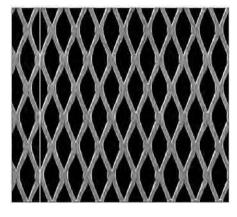

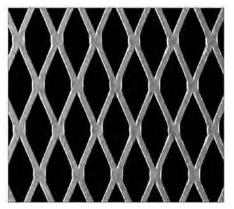

Standard, or raised, expanded metal is an extremely versatile material. It's easy to control the percentage of open area to suit the application by altering the pattern size and/or strand width, thus increasing the flow of air or light in the finished product. Expanded metal offers a tremendous amount of form-ability — it's able to withstand a 90-degree bend within a 1/4" inside radius without breaking.

Manufacturers that are concerned about minimizing operating expenses will appreciate raised expanded metal's cost-effectiveness. The slitting and stretching process produces no scrap or waste material.

EXPANDED METAL - FLATTENED

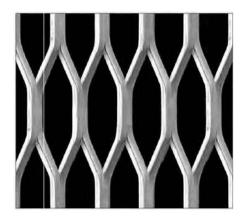

Flattened expanded metal is an extremely versatile product that is created by making multiple slits in a sheet of metal, then stretching the sheet to produce a unique diamond pattern. This variation of the standard expanded metal manufacturing process involves flattening the sheet by passing it through flattening rolls, a technique known as "cold rolling". This produces thin, expanded metal sheets and stretches the pattern even further, while also providing a smoother, flatter finish.

EXPANDED METAL - GRATING

Expainded metal grating is a strong and economical product used in a variety of industrial, commercial, architectural, and drainage applications. Our expanded metal gratings are used for bridge walkways, water treatment plants, industrial plant construction, heavy duty fence and barrier construction, utility and other trailer manufacturing. It can be made into economical vertical screening, fire escapes, stair treads, mezzanines, ramps, and walkways, as well as oil and gas platforms.

Aluminum Laser Cut Screen

16+Year's experience for producing decorative and architectural wire mesh Glad to work with worldwide architects and designers

Aluminum Laser Cut Screen

Our Aluminium Screens are made from lightweight, tough, rust free aluminium with a powder coated finish.

The screens are suitable for indoor and outdoor use with a variety of applications. As the screens are made from powder coated aluminium, they require very little ongoing maintenance.

Our exclusive designs feature in commercial environments – retail, hotels, bars, restaurants, leisure, offices, financial institutions as well as luxury residences and apartments.

SPECIFICATION:

Material: Aluminium alloy

Material thickness: 1mm-20mm, up to requirement Design pattern: Choose from our pattern or customized

Color: White, black, gray, silver, brown, all RAL colors available Surface finish: Polyester powder coated, PVDF, electroplate

Installation: We can supply all accessories

Features

- Fashion design
- Sturdy and durable
- Preferred material
- Antiseptic and antirust

APPLICATIONS

- Hotel
- Garden
- Restaurant
- House
 - Lounge

1.Preferred material

High strength, good mechanical properties, physical properties and corrosion resistance

2. Thicker material

Thick metal, strong and durable, not easy to break

3. Exquisite pattern

Exquisite pattern, simple, beautiful and durable
